#### Atchison City Comm to Discuss Water Project

Atchison City Commissioners will decide on what to do moving forward with various city water projects Monday afternoon.

They will meet at 4:30 at city hall to discuss water storage, as well as disinfectant byproduct control options at the water treatment plant with Utilities Director Mike Mathews.

Commissioners will also look to adopt an ordinance involving an MGP encroachment.

They will look to accept the low bids for slurry seal materials for this year.
