Atchison Utility Customers Can Now Pay Online

(KAIR) -- City of Atchison utility customers can now pay their monthly bills online.

Customers can input their account number and service address number to make a one-time credit card payment, or create an account to view their bill and payment history, make additional payments, and link multiple utility accounts at www.cityofatchison.com.

The city plans to enhance online payment services further as additional options become available through the city's web site provider.

Plans are underway to provide customers with a paperless billing option and give them the ability to save their credit card information for future payments.
