New Bridge Opens in Jefferson County

(KNZA)--A Jefferson County bridge replacement project is now complete.

The Kansas Department of Transportation says the new K-192 bridge over Indian Creek opened to traffic Tuesday afternoon.

Construction on the bridge began in early April. The existing 24-foot bridge has been replaced with a 36-foot structure.

Hesston-based King Construction Company was the primary contractor on the more than \$720,000 project.
