Minor Flooding Continues Along Missouri River

(KLZA) -- Minor flooding continues today along the Missouri River from the Brownville area south through Rulo.

The River is forecast to crest at Brownville Thursday afternoon about 1.5 feet above flood stage at 34.5 feet. The river stage at Brownville is predicted to drop below the 33-foot flood stage Friday afternoon.

At Rulo it appears the river crested about 1 a-m Thursday morning at 19.94 feet which is nearly three feet above flood stage. At Rulo the river is predicted to drop below flood stage early Friday afternoon.
