Funnel Clouds and Hail Reported in SE Nebraska

BEATRICE, Neb. (AP) - Two tornado sightings were reported in southeast Nebraska Sunday evening.

The National Weather Service says a member of law enforcement reported a twister crossing U.S. Highway 77 north of Cortland around 8:25 p.m. Sunday. No injuries were reported.

A storm chaser reported a tornado about two miles northeast of Adams in Gage County 10 minutes later. It's not clear whether the reports were about the same tornado. The sightings have not been confirmed.

The service also says Sunday's storms brought 2-inch hail to Lancaster, Gage and Johnson counties.
