KDOT Announces Survey For Bridge Study

(KAIR)--The Kansas Department of Transportation has announced the launch of an online survey designed to gather input on future options for replacement of the Route 92 Centennial Bridge.

The route 92 Centennial Bridge study is currently underway, and the survey follows the completion of two open houses, held last week in Platte County Missouri and Leavenworth County. During both meetings, display exhibits on the study updates were available, and are now available online for viewing at <http://bit.ly/1OCPKWA>.

The survey will be open for public input through August 31st, and all information gathered will be reviewed by the study team.

If you are interested in taking part in the survey, just go to <https://www.surveymonkey.com/r/Rt92CentennialBridge>.

The purpose of the study is to examine options for constructing a four lane replacement bridge spanning the Missouri River between Platte and Leavenworth counties.
