#### Kansas Senior Farmers Market Nutrition Program

The Kansas Department of Health and Environment is offering a webinar for vendors to qualify to accept vouchers from low income senior citizens. I have personally spoken with vendors who participate in the Kansas Senior Farmers Market Nutrition Program. Vendors who had used this system gave it very positive feed back stating that it was no different for them than depositing a check in the bank. Vendors also stated they otherwise would have missed out on the sell and lost money if not for this program. For the Seniors is ensure they are able to purchase fresh non prepared local produce. Vendors are able to register to participate using this website and listening to the webinar.
