Local Lake No Longer Under Health Warning

**(KNZA)--The Atchison County Lake is no longer under a public health warning due to high levels of toxic blue-green algae.**

**The lake was not included in a list of lakes under warning status in a new release from the Kansas Department of Health and Environment Thursday.**

**Five lakes are included in the latest list—including Milford Reservoir.**

**Lakes under a warning are not closed. However, direct contact with the water is strongly discouraged for people, pets and livestock.**
