Westar warns of latest scam

**(MSC News)--Westar Energy is working to keep its customers safe.**

**That comes as scam attempts are being reported to the energy supplier.**

**According to a press release from the company, customers have reported receiving phone calls from someone claiming to work for Westar.**

**The fake representative demands that the customer provide them with a prepaid card as payment, due to what the caller claims to be late payment on a bill. Saying service will be cut off, the fake employee claims the customer can avoid disruption by calling a number, which spoofs an actual Westar phone number.**

**The company says the calls are clearly a scam, and they should be reported to either 800-383-1183 or local law enforcement.**
