Boil advisory lifted for Westmoreland

**(KMZA)--The Kansas Department of Health and Environment has rescinded a boil water advisory for the Pottawatomie County community of Westmoreland.**

**The advisory was issued Tuesday because of a line break, which caused a loss of pressure.**

**Failure to maintain adequate pressure may result in a loss of chlorine residuals and bacterial contamination.**

**KDHE says laboratory testing samples collected from the city indicate no evidence of contamination and all other conditions that placed the system at risk of contamination are deemed by the agency to be resolved.**
