Boil advisory rescinded for city of Reserve

(KNZA)--The Kansas Department of Health and Environment on Friday rescinded a boil water advisory for the Brown County community of Reserve.

The advisory was issued March 9 because of a loss of pressure. Failure to maintain adequate pressure may result in a loss of chlorine residuals and bacterial contamination.

KDHE says laboratory testing samples collected from the City of Reserve indicate no evidence of contamination and all other conditions that placed the system at risk of contamination are deemed to be resolved.
