

Boil advisory issued for Jefferson Co RWD#10

(MSC News)--The Kansas Department of Health and Environment (KDHE) has issued a boil water advisory for Jefferson County Rural Water District No. 10 located in Jefferson County.

Customers should observe the following precautions until further notice:

- If your tap water appears dirty, flush the water lines by letting the water run until it clears.**
- Boil water for one minute prior to drinking or food preparation or use bottled water.**
- Dispose of ice cubes and do not use ice from a household automatic icemaker.**
- Disinfect dishes and other food contact surfaces by immersion for at least one minute in clean tap water that contains one teaspoon of unscented household bleach per gallon of water.**
- Water used for bathing does not generally need to be boiled. Supervision of children is necessary while bathing so that water is not ingested. Persons with cuts or severe rashes may wish to consult their physicians.**

The advisory took effect on May 06, 2019 and will remain in effect until the conditions that placed the system at risk of bacterial contamination are resolved. KDHE officials issued the advisory because of a flooded well. Flooding in wells may result in bacterial contamination.
