

Crop Update

Sixty-nine percent of the nation's sorghum acreage was planted by June 16, nineteen percentage points behind the previous year and 12 points behind the five-year average. Planting progress in Kansas, Nebraska, Oklahoma, and South Dakota was behind the average pace by 16, 14, 17, and 16 percentage points, respectively. By June 16, fifteen percent of the nation's sorghum had reached the headed stage, three percentage points behind last year and one point behind average. Fifty percent of Texas' sorghum acreage had reached the headed stage by June 16, four percentage points behind last year but four points ahead of average.
