Horton City Hall remodel underway

(KNZA)--A remodeling project is underway at the Horton City Hall.

An ADA complaint bathroom, a break room and additional office are being installed.

The new features are being built in what was formerly a garage stall and a room that was being used for storage.

City Clerk Kim Knudson says the work is being done by Derik Kesler, of Topeka, for around \$57,000.

Knudson said the project started about 3 weeks ago and is to be completed by November 8.
