

Holt County bridge project work to begin

**(KLZA)-- Weather permitting, construction on two Interstate 29 bridge projects is to begin this week in Holt County, Missouri.**

**The Clarkson Construction Company is to begin a deck replacement project for the I-29 bridges over Route E and Kimsey Creek south of Mound City. The bridges are included in Governor Mike Parson's \$351 million Focus on bridges program, which is to repair 250 bridges across the state.**

**Crews are also to begin work on both the north and southbound lanes and shoulders of I-29 at the bridges for traffic changes during the bridge deck replacements.**

**Construction of both bridge decks is expected to start April 16, beginning with the north and and southbound driving lanes. The project will include a 12-foot width restriction.**

**Once the bridge decks are replaced in the driving lanes, crews will begin construction of the passing lanes.**
