Transmission line project set in Jackson Co

(KNZA)--A transmission line installation project on U.S. 75 in Jackson County is set to begin Saturday, June 6, and is expected to be complete Monday, June 8.

That word comes in a release from the Kansas Department of Transportation.

KDOT says a high voltage overhead transmission line will be installed over U.S. 75, north of Holton. Work will occur during daylight hours, weather allowing.

Traffic will be controlled using a pilot car operation, lane closure, signage and traffic cones. Drivers should expect delays and are advised to find alternate routes.
