USDA simplifies loan application form

The U.S. Department of Agriculture (USDA) has developed a simplified direct loan application to provide improved customer experience for producers applying for loans from the Farm Service Agency (FSA).

The simplified direct loan application enables producers to complete a more streamlined application, reduced from 29 to 13 pages. Producers will also have the option to complete an electronic form or prepare a traditional, paper application for submission to their local FSA farm loan office. The paper and electronic versions of the form will be available starting March 1, 2023.

Approximately 26,000 producers submit a direct loan application to the FSA annually, but there is a high rate of incomplete or withdrawn applications, due in part to a challenging and lengthy paper-based application process. Coupled with the Loan Assistance Tool released in October 2022, the simplified application will provide all loan applicants access to information regarding the application process and assist them with gathering the correct documents before they begin the process. This new application will help farmers and ranchers submit complete loan applications and reduce the number of incomplete, rejected, or withdrawn applications.

Producers can explore all available options on all FSA loan options at fsa.usda.gov or by contacting their local USDA Service Center.
