

Field survey planned on K-20 in Doniphan Co

(KNZA)--Beginning Monday, Feb. 5, the Kansas Department of Transportation will conduct a field survey for a culvert extension on K-20 in Doniphan County. The structure is located about 3 miles south of Denton.

KDOT says the survey is necessary to gather information for the detailed design of the proposed improvements and is expected to be complete by the end of March.

Brent Thompson, P.S., Survey Project Manager, BHC, will be in charge of the survey for KDOT.

A member of the survey crew first will contact property owners and/or tenants for permission to enter private property. Survey activities will include the use of survey instruments on the ground to determine locations of existing features within the survey corridor.
