#### Two-way Traffic in Downtown Falls City

(KTNC) - Traffic through downtown Falls City now flows north and south. City crews removed the one-way signs on Stone and Chase Streets early Monday morning, marking the official change from one way to two way traffic.

The parallel parking remains in effect on the east side of Stone Street, with angle parking on the west side of the street.

The change to two-way traffic follows on the heels of completion of phase two construction of Falls City's Main Street Renovation project.
