Some Atchison Water Customers Left Without

(KNZA)--A water main break in the City of Atchison has forced the shut down of water for some customers.

According to a news release from the city, the affected location is the area of 286th Road between Pratt and Fremont. However, some other nearby areas may also be without.

The City says it's working to complete the repairs and will restore water service to the affected customers as soon as possible, but there's a chance it could take until early Tuesday evening before full service is restored.
