Cash Rental Rates Published

The most recent Kansas Agricultural Statistics Service rental rate surveys were published September 10th. They are now available online through the KSU Agricultural Economics website at www.agmanager.info . Select the Land and Leasing and then Land Rental Rates tab for a list of publications that include these results and other rental information as well.

Notable for counties of the Meadowlark Extension District this year is the absence of a reported non-irrigated cropland cash rent number for Jackson County. This follows a second reporting period with no pasture cash rent number for Nemaha County. Why? In most cases, if enough data cannot be collected from a survey question to give a statistically relevant response, no data is reported.

You'll likely note the availability of other rental rate numbers available on AgManager as well. Next week, I'll break the other data available there as it pertains to rental rates. In the meantime, if you want a copy of the KASS report, e-mail me at dhallaue@ksu.edu or contact any of our Meadowlark Extension District Offices
