Boil advisory lifted for Lakeside Improvement District
(KNZA)--A boil water advisory has been rescinded for the Lakeside Village Improvement District, located in Jefferson County.

That word came Friday in a release from the Kansas Department of Health and Environment.

The advisory had been issued June 29 because of a loss of pressure in the system. Failure to maintain adequate pressure may result in a loss of chlorine residuals and bacterial contamination.

KDHE says laboratory testing samples collected from the Lakeside Village Improvement District indicate no evidence of bacteriological contamination and all other conditions that placed the system at risk of contamination are deemed to be resolved.
