Plans approved for Mound City bridge

(KLZA)-- Plans have been approved for a new bridge over Davis Creek on the south edge of Mound City.

During their July 20, meeting, Mound City Aldermen approved the plan for a bridge that will be 75 feet long and will be 32 feet wide, including a fenced sidewalk, making it approximately seven-and-a-half feet wider than the current bridge.

Once the required environmental studies are completed, its anticipated the project will take three to four months to complete depending on weather.
