SPARK funds available for Brown Co businesses

(KNZA)--The PPE & Sanitization Reimbursement Program has been created by Brown County from funds provided by the Kansas SPARK Program.

According to a news release, the program is designed to provide economic support to small businesses and non-profits in Brown County facing additional cost due to the COVID-19 pandemic, particularly for personal protective equipment and sanitization items.

The release says the goal of this program is to help businesses and non-profits to rebound from the difficulties that have been faced during the pandemic so far.

A committee will review the applications and award grants based on need.

Additional information on the program and an application is available on the Brown Co website. <https://www.brcoks.org/home/news/spark-funds-available>
