

Peru water boil advisory

**(KLZA)--The City of Peru has announced that beginning Monday, June 7th water will be trucked into Peru while mandatory maintenance takes place on the temporary water treatment plant and well.**

**As a result the city will be in a boil advisory and a stage three water emergency.**

**The city's supply will be trucked in from Auburn. Therefore it will be necessary to vigorously boil your water for 1 minute for drinking and cooking or to use an alternate source of water until sampling confirms that no further bacteriological contamination has occurred.**

**Peru Community Impact Group has donated pallets of drinking water that will be available to the public.**

**The city is also requiring that water conservation be practiced to ease the burden of hauling water.**

**During a stage three water emergency there is to be no use of outside water , car washing, all lawn/irrigation or waste of water.**

**The city will notify it's residents as soon as the stage is able to be lifted.**
