Health advisory remains in place for two local lakes

(KNZA)--A public health advisory remains in place for two lakes in Brown County due to blue-green algae.

The Kansas Department of Health and Environment, in conjunction with the Kansas Department of Wildlife and Parks, announced Thursday in a news release that the Brown State Fishing Lake, northeast of Robinson, and Horton's Mission Lake remain under “watch” status.

For lakes under “watch” status, people are encouraged to avoid areas of algae accumulation and keeps pets away from the water.

You should clean fish well with potable water and eat the fillet portion only.
