

Area bank customers targeted by "fraudster"

**(KAIR)--Customers of a local area bank are being warned about an attempt to steal their money.**

**That word comes in a release from Denison State Bank, which warns that the Jackson County-based bank has been targeted by what the release called "a fraudster."**

**According to the release, the person is impersonating the Denison State Bank's so-called "fraud department," contacting customers by phone, email, or text, saying the customer needs to take action to prevent unauthorized transactions from posting.**

**The release says "the fraudster talks the customer into revealing their [bank account's] login credentials and then does a login and takes their money."**

**The release notes it's believed the fraud attempts are originating in Florida, though the phone number received by the intended bank customer victim indicates the bank's correct, main phone number.**

**Denison State Bank customers are told the scam attempts began around August 12.**

**Such phone calls should be ignored, but if someone falls victim, they should contact the bank at 785-364-3131 or email [online@dsbks.com](mailto:online@dsbks.com).**
