

Mound City School Board hears update on projects

**(KLZA)-- During the August 17 meeting of the Mound City Board of Education, Superintendent Korey Miles presented a plan for spending of ESSER II and ESSER III monies available through the federal government.**

**The Superintendent noted that the school district currently has roofs that have been well maintained by maintenance staff, but that new roofs are needed as they are getting older.**

**Miles said they will be looking soon at bids for roof replacement on possibly six roofs.**

**Miles also noted that the projects at the football field and track are moving along. The retaining wall has been completed and the lighting project has been completed.**

**Fisher Track is to begin their paving possibly this week. They are behind due to untimely rains and the large amount of rain during those times.**

**The new scoreboard has been installed and is working.**
